GliSODin® is both a protected and targeted SOD, supported by more than 25 clinical and scientific studies.

GliSODin®, a patented nutraceutical ingredient, has been shown in clinical research to:
- Promote the production of the body’s own, natural antioxidants
- Help maintain cellular health and protect against damage caused by oxidative stress
- Support skin health against photo-oxidative stress
- Reduce lactic acid buildup in humans under physical stress
- Support healthy immune function
- Promote cardiovascular health
- Prevent stress induced impairment of spatial memory (neuroprotection)
